Mountain View, CA • (469) 952-8447 • sanjanavnkt20@gmail.com • [LinkedIn](#) • [sanjanavenkat.com](#) • <https://github.com/sanjana-venkat>

Senior Product Designer with 3+ years designing enterprise web and mobile applications and shaping model behavior, output classification, and response design for AI-native products by defining how models understand user intent, filter and structure outputs. Skilled at getting teams to move fast shipping polished, high-fidelity interactive prototypes with AI-assisted coding. Adept at cross-functional collaboration with engineering, product, and data teams to drive measurable business impact.

EXPERIENCE

JP Morgan Chase, Senior Product Designer, Home Lending B2C

Jan 2024 – Present

Conversational AI and Personalization

- Enabled 1000+ successful customer calls with Casey AI, an omni-channel conversational AI (call/text). Shaped end-to-end model behavior defining how the model should respond, classify user intent, and adapt tone and output across use cases
- Designed response filtering and output constraints for Casey AI's conversation models, specifying decision logic for how the model escalates, deflects, or resolves queries especially with edge cases
- Achieved 17% CTR with personalization framework using behavioral segmentation and mapping user needs to model output clusters, enabling the recommendation system to classify intent and produce contextually appropriate responses
- Concepted AI-first search interfaces in a 1-week sprint with visual rebranding and interaction principles for integrating LLMs (Gemini, ChatGPT) for a leadership pitch with CEO, Jamie Dimon
- Built a modular, atomic design offer template enabling zero design/engineer lift for new campaigns, accelerating go-to-market velocity by 3 sprints and strengthening design system consistency

Application Flow & Fulfillment

- Designed complete 0-to-1 HELOC experience including wireframes, high-fidelity UI mockups, service design blueprint and a research-driven rate tool delivering 66% lead submit rate and improving user confidence in complex financial workflows
- Reduced 7% drop-offs and mitigated credit concerns with multivariate testing and content strategy

Paycom, Product Designer (Assoc.)

May 2023 – Dec 2023

- Redesigned fragmented B2B enterprise SaaS workflows into scalable project management experiences through VoC research, workflow optimization, and high-fidelity prototyping in close partnership with engineering
- Operationalized Paycom's first component enhancement process by learning atomic design, proposing global navigation improvements, advocating to leadership, and guiding engineering by influencing product roadmap

Dialexa EDU Mentorship, UX Designer

2-Day Competition

- Designed a gamified VR experience in a 2-day competition to immerse users in Dallas' history with an engaging approach to travel

CHETNA, Graphic Design

Sept 2020 – Sept 2021

- Designed graphics for social media promoting South Asian mental health and raised over \$10K with campaigns

PROJECTS

Outdone - <https://travel-dna-kohl.vercel.app/>

3 Days

- Designed a 9-archetype mood classification framework to shape Gemini's output by defining behavioral signals and intent filters
- Identified the personalization gap where recommendations rely on historical data rather than real-time intent; designed and deployed a full AI-powered planner in 3 days with Gemini and Google Maps API integrations

Portfolio - <https://www.sanjanavenkat.com/>

2 Days

- Combined product design, visual design, and AI-assisted engineering leveraging Claude, Codex and working knowledge of React, Tailwind CSS to build and deploy a conversational portfolio experience from concept to production in under 48 hours

SKILLS

Model & AI Design: Model Behavior Design, Output Classification, Response Filtering, Intent Mapping, Conversational AI, Behavioral Frameworks, Agentic Workflows, Prompt Engineering, AI Personalization, Human Feedback Collection. **Design:** Interaction Design, Visual Design, High-Fidelity Prototyping, User Flows, Design Systems, Atomic Design, Figma, Sketch/Adobe. **Research & Growth:** A/B & Multivariate Testing, Conversion Optimization, Funnel Analysis, VoC Research, Usability Testing, Data-Driven Design. **Tech:** React, Tailwind CSS, Claude Code, Codex, Google Stitch. **Collaboration:** Stakeholder Alignment, End-to-End Ownership, Agile/Scrum

EDUCATION

University of Texas at Dallas, B.S. in Psychology, Concentration in Design

Aug 2020 – May 2023

GPA: 3.88/4.00 | Vice President of UX Club
